

Put Safety First with PolyLight™

Light Tape[®] UK Limited, ProGrip Systems, and Electro-LuminX[®] are pleased to announce the launch of a new range of illuminated, anti-slip stair treads called PolyLight™. The PolyLight™ System is available in a variety of sizes, colors and surface finishes, fitting into standard aluminum stair nosing, or as a full depth GRP anti-slip treading. PolyLight™ encapsulates ½" or 1" Light Tape[®] in a proprietary formulation for both indoor and outdoor use.

A PolyLight™ Insert with ½" Light Tape[®] encapsulated inside a yellow anti-slip compound and shown here inserted into a standard Morley HN1 aluminum nosing channel.

PolyLight™ stands up in harsh environments from freezing temperatures to the thermal shock of thawing in boiling water.

Why choose PolyLight[®] with Light Tape[®]?

- PolyLight™ Inserts have been developed to fit into standard aluminum stair profiles, timber stairs, and decking. It can also be supplied in sheet form to cover the full stair tread or landing.
- A variety of colors are offered for both the anti slip insert and the Light Tape[®]. There are also 6 grades of anti slip available for both interior and exterior use.
- The Light Tape[®] electrical connections are embedded in resin, making PolyLight™ ideal for your next outdoor installation.
- The Disability Discrimination Act has recently been updated to provide extra protection to the Partially Sighted, putting emphasis on both the illumination of stairs, and making columns and pillars in public areas more visually apparent. Light Tape[®] and PolyLight™ can assist with both of these areas with cost effective and simple solutions.

Safety lighting never looked so good! The Lion Bar and Club near Birmingham, UK installed 22 meters of yellow PolyLight™ (as shown in top left) around the facility to make tricky steps more visible.
