

INTERNATIONAL LIGHT WEEK

INTERNATIONAL
LIGHT WEEK

26 - 28 MAY - LYON EUREXPO - FRANCE

Lyon 2009

—
From shadow to light
Exhibit !

In partnership with

www.international-lightweek.com

Do not miss your market share !

The French lighting market

72 billion euros !

- A market in expansion : ↗ **+9,2%**
- Increase in local municipality investment ↗ **+9,5%**
- Increase in imports : ↗ **+3,8%**

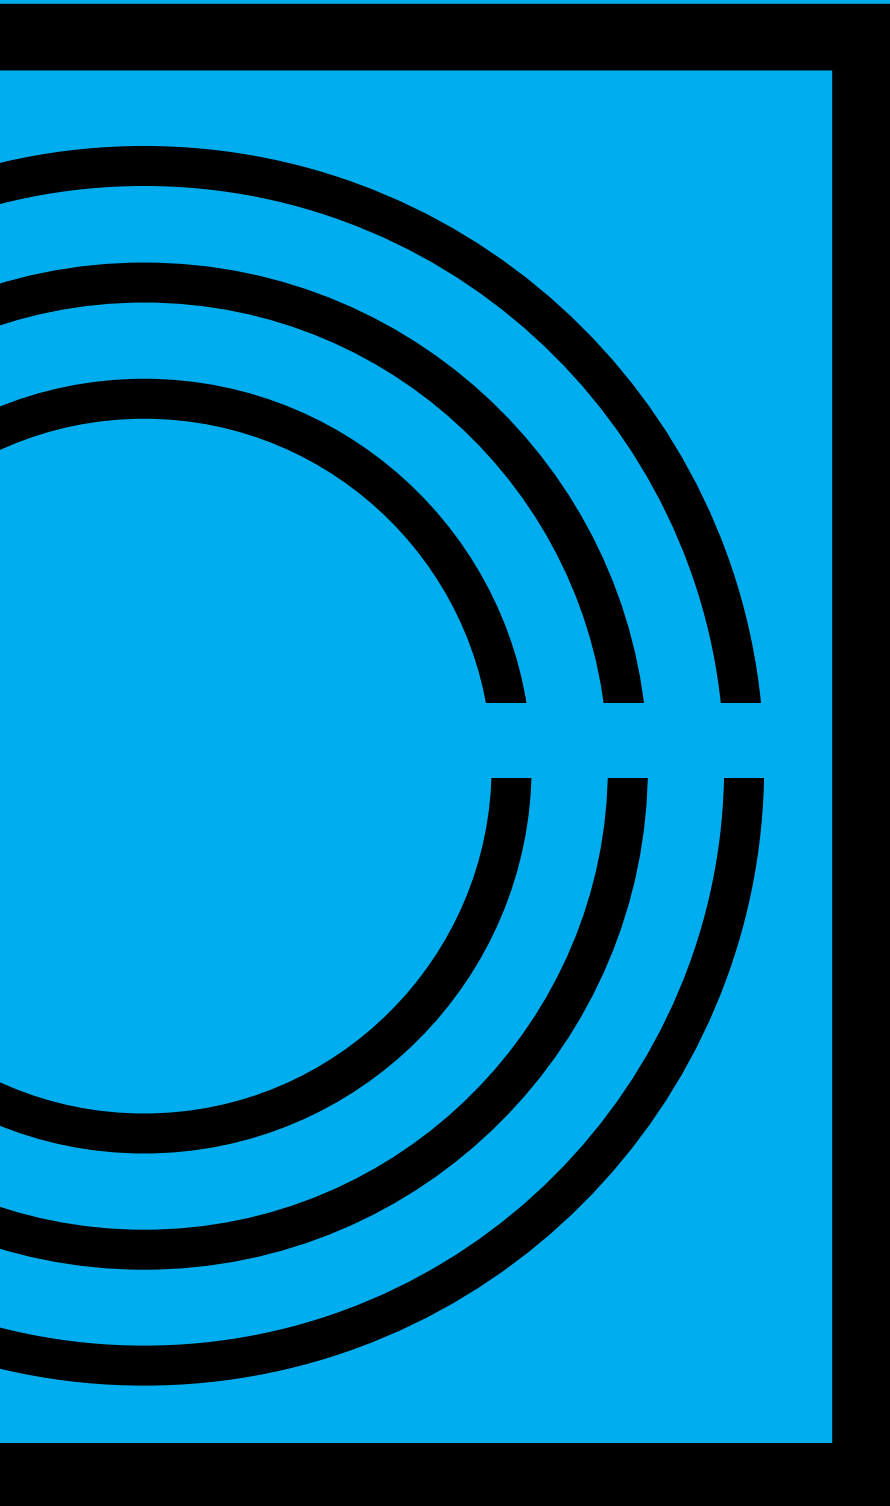

Lyon and the Rhône Alpes region

*The first french region in the field
of the lighting industry !*

- The presence of large international groups such as SCHNEIDER ELECTRIC, PHILIPS FRANCE, SIEMENS ...
- More than 300 companies and 10,000 jobs: small and medium-sized companies, manufacturers, OEMs, distributors, service companies and research agencies.
- Research and education divisions.
- Cradle of the first light cluster.
- 1st lighting plan in the world (1989), the archetype of European city lighting.

Unique surroundings 100 % light ! 2 Trade fairs, 1 event !

An experts' offer

Indoor Lighting

- Architectural & technical
 - Decorative
- Specific (museums, hospitals, conference centres etc.)
 - Shop Lighting
 - Security

Outdoor lighting

- Architectural & technical
- Urban and road lighting
 - Specific lighting (tunnels, airports etc.)
 - Dynamic lighting
- Festive lighting and events lighting

New technologies

- LEDs
- Fibre optics
- Piloting and lighting management

Accessories and components

- Light sources
 - Tracks
- Transformers
 - Ballast
- Connectors
- Electronics

Services

- Technical studies
 - Installation
 - Maintenance

Energy

- Production
- Distribution and management

INTERNATIONAL LIGHT WEEK 2009...

A brilliant business meeting

Creating contacts and doing business: these are the aims of the *LumiVille* and *Inlight Expo* trade fairs.

LumiVILLE

The international outdoor lighting trade fair

A grand scale meeting place for lighting professionals, *LumiVille* is the only Trade fair in Europe that is entirely dedicated to exterior and public, town and city lighting.

Town and city, public space and monument lighting is a vehicle for image and dynamism and contributes to the transformation and promotion of cities..

LumiVille is a unique opportunity to present your skills in the exterior lighting field to professionals.

iNLight EXPO

The international indoor lighting trade fair

Light is an element of our environment, whether it is a question of promotion, comfort or even decoration, its role in interior decoration is decisive.

Inlight Expo is the ultimate meeting place for actors and major interior lighting professionals.

Success in figures

- 350 exhibitors
- 14 500 visitors expected
 - +17 % increase in visitor numbers each year
- Over 50 conferences and workshops
 - 600 000 invitations sent
- Distribution of an official catalogue (14 500 copies)
- Over 400 daily hits on our website.

www.international-lightweek.com

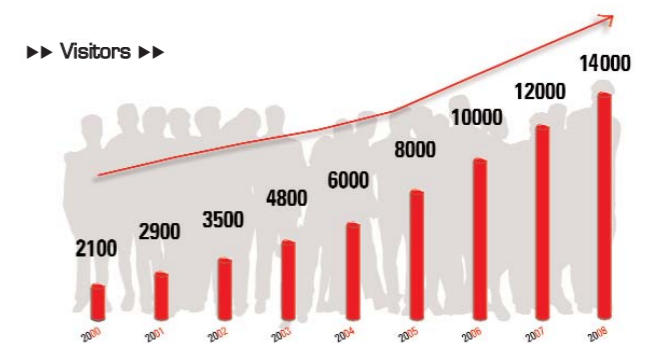

Meet more than 14 500 customers in only 3 days !

Professional and qualified visitors...

LumiVille and *Inlight Expo* are above all business trade fairs that will enable you to meet with decision-makers :

- Lighting designers
- Architects
- Landscape architects
- Urban planners
- Engineers, Technicians
- Installers
- Technical managers, Service general managers
- Local authorities
- Public establishments (hospitals, museums, conference centres etc.)
- Distributors
- Purchasers and purchase centres
- Developers
- Shops (networks, franchising, shop centres)
- Others

In 2008, *LumiVille* and *Inlight Expo* received 14 000 visitors : A 17% increase on the previous year.

Focus on the 2009 strengths ...

▶▶▶ The Renewable Energies' division

Faced with an increase in energy bills, towns and cities are turning more and more towards renewable energies, a less expensive solution that is more respectful of the environment. They ensure the double advantage of reducing greenhouse gas emissions (as provided for in the Kyoto Protocol: 20% reduction in CO2 for 2012) and offer renewable resources that are therefore impossible to saturate.

An electric rendezvous !

▶▶▶ The projection and monumental images division

Evening festivals tend to be on the increase throughout towns and cities thanks to ingenious illumination techniques such as the projection of monumental and ephemeral images. Artistic and storytelling, monumental images are a surprising and attractive spectacle for the public, in addition to traditional lighting, they enable us to illuminate architectural heritage, tell stories, but also create virtual sets that are sometimes realistic, sometimes abstract.

▶▶▶ The "LumiVille trophies"

For the 5th consecutive year, CDO, ACE (Association des Concepteurs lumières et Eclairagistes - Lighting Designer's Association) and the city of Lyon will publicly reward lighting designers. The winners in three categories (public space, architectural lighting and young light designers) will be rewarded.

LUCI (Lighting Urban Community International) is an association that brings together municipal political leaders who have expressed an interest in sharing their experiences within the lighting domain in view of the creation of an international network for town and city lighting.

The aim of this organisation is to come up with ideas for and promote lighting at the service of cities and towns by bringing together the essential actors. Light brings the history of cities to life in the eyes of the world. The organisation, presided over by the city of Lyon has a global remit. It contributes to light becoming a major tool in life, architecture and urban development.

Today LUCI has more than 50 members; towns and cities in the world and organises events across the planet..

* *Ans (Belgium) - Birmingham (United Kingdom) - Bordeaux (France) - Budapest (Hungary) - Brussels (Belgium) - Chartres (France) - Eindhoven (Netherlands) - Erevan (Armenia) - Geneva (Switzerland) - Gent (Belgium) - Glasgow (United Kingdom) - Goteborg (Sweden) - Hamburg (Germany) - Istanbul (Turkey) - Jyväskylä (Finland) - Leipzig (Germany) - Liege (Belgium) - Ludenscheid (Germany) - Lyon (France) - Marseille (France) - Milano (Italy) - Moscow (Russia) - Paris (France) - Rotterdam (Netherlands) - Pecs (Hungary) - Saint Etienne (France) - Saint Paul de Vence (France) - Tallinn (Estonia) - Torino (Italy) - Varna (Bulgaria) - Abu Dhabi (United Arab Emirates) - Beit Sahour (Palestinian Territories) - Dubai (United Arab Emirates) - Gimhae (Korea) - Guangzhou (China) - Gwangju (Korea) - Ho Chi Minh Ville (Vietnam) - Hue (Vietnam) - Incheon (Korea) - Jericho (Palestinian Territories) - Nanjing (China) - Negombo (Sri Lanka) - Putrajaya (Malaysia) - Seoul (Korea) - Shanghai (China) - Abomey (Benin) - Alger (Algeria) - Ouagadougou (Burkina Faso) - Porto Novo (Benin), Rabat (Morocco) - Montreal (Canada) - Philadelphia (USA) - San Jose (Costa Rica) - San Luis Potosi (Mexico)*

LUCI has included LumiVille and Inlight Expo trade fairs in its 2009 diary.

Dinners, conferences, organisation of visits... everything is included. Technical and political, urban and lighting leaders who are members of the association will enjoy a showroom with no organisational constraints..

▶▶▶ The Lumi-technologies division

Light composers !

Apart from promoting the finished product, *InLight Expo* emphasises the components and accessories: active and passive components, devices, connection equipments, light sources, LEDs, equipment and systems... Offering visitors, manufacturers and integrators (OEMs) an innovative and specialist offering, *InLight Expo* has extended its skills and has confirmed its place as an indispensable platform for exchange surrounding the latest solutions and technologies in terms of lighting.

▶▶▶ Shop lighting division

The right light to sell better !

For its 3rd edition, the *Inlight Expo* trade fair has put in place the Shop Lighting section.

Sales professionals know it well - to attract customers and to develop sales, their sales' locations and products must be displayed at their best, and this must be done above all with lighting.

This section is for all light professionals, a unique opportunity to meet senior buyers, networks, shopping centres... who are all in search of a quality offering within the field of shop lighting.

▶▶▶ Conferences and technical workshops

During the 3 days of the exhibition, exhibitors and experts from the world over present the latest trends in terms of lighting. These conferences will enable exhibitors to contribute and present their know-how to a qualified audience in quest of effective solutions.
