

Mounting Materials

ADHESIVES

Light Tape® Edge Guard™: A moisture resistant clear tape for interior applications for protective sealing against electric shock.

Light Tape® VibraMount™: Designed to easily secure Light Tape® panels to almost any surface while eliminating vibration, VibraMount™ is a double sided adhesive foam core material available in tileable panels.

Durashield 511 overlay series: A 3M 4195C/ EZ Polyethylene Protective Tape is perfect for exhibitions, museums and temporary events. It protects Light Tape® from side scuffing, abrasion and impact while on temporary installations of a few weeks

Durashield 471 (3M 471 for floor marking) is designed for more heavy duty industrial or permanent applications, such as factory floors. Both materials were developed by 3M to deliver the perfect Light Tape® adhesion and barrier for floor applications.

VHB: Designed to secure Light Tape® strips to almost any surface while eliminating vibration, VHB is a double sided adhesive foam core tape. Clear core is available in 0.5" and 1", and black core 60 mil (1/16" / 1.6 mm) is available in widths up to 24" for large panel installations. Also, it provides impact resistance on uneven surfaces.

PROTECTIVE SEALANTS

3M DP-100+ epoxy: A two part epoxy system offering fast cure and machinability. It is easily mixed and meets UL 94. Perfect potting compound for outdoor connections.

Light Tape® shrink tube: A heat-forming tube used in conjunction with our outdoor Snap-N-Light™ mounting system to form a moisture barrier and secure connector to channel.
