

## BRING YOUR IMAGINATION TO LIGHT™

THE EGRESS LIGHTING SOLUTION

### ■ Rapid Installation

Customers are reporting over a 50% reduction in installation time and costs. StepGuard® arrives ready to install. All you need is a drill and a screw driver. Power can be remotely located, and one transformer can illuminate an entire theater.

### ■ Unmatched Durability

Our end caps don't fall off and our light system never fails. StepGuard® is a completely integrated aluminum extrusion line that is assembled mechanically with screws and not hot glue. It does not come apart, and virtually no maintenance is needed after installation.

### ■ Dimmable

Dim to zero without any flicker. Completely seamless integration into any control system. Unlike LEDs, Light Tape® can run for 40,000 hours and never get hot.

### ■ Top Quality

Light Tape is built with pride in the USA utilizing the best materials and manufactured to last. StepGuard® extrusions and accessories make a great product even better.

### ■ Green System

Utilizing the most energy efficient lighting system available, Light Tape® can cut energy cost by 70%.

### ■ Even Illumination

StepGuard® utilizes Light Tape® to create the luminaire. No hot or cold spots at any size, a completely uniform light source without the need for diffusion. Light Tape® is extremely visible like a laser, yet does not cast light on your screen like a common LED.

## Introducing StepGuard™ The Egress Lighting Solution.

The StepGuard™ System was methodically developed for Light Tape® after years of field testing. The only solution in the world where the manufacturer not only makes the profile but also the light, resulting in a complete lighting solution that is not only elegant, but a tremendous value. Ideal for cinemas, auditoriums or any venue where safety is paramount.

Light Tape® has over a decade of performance in the aerospace and automotive industry, known for reliability and durability in the toughest applications and environments. StepGuard™ sets a new standard for egress lighting.
